EDUCATION

MCA - Masters in Computer Applications

Maharaja Agersen University

2021-2023

MCA (Master of Computer Applications) is a postgraduate degree in computer science and information technology. It focuses on developing skills in programming, software development, database management, web technologies, and system design. The course typically lasts 2-3 years

Post Graduation in Computer Applications

Rabindranath Tagore University

2021-2022

Completed a PGDCA diploma through distance learning at Rabindranath Tagore University, gaining comprehensive knowledge in computer applications and IT skills.

PROFILE

I hold an MCA with a strong foundation in Computer Science and expertise in JavaScript, React.js, HTML, and CSS. Passionate about designing visually appealing and user-friendly interfaces, I am currently engaged in freelance projects and working with Younedia, where I leverage my skills to deliver top-tier web solutions. My experience with Next.js14, Firebase, typescript and Node.js helps me build fast, scalable applications that enhance the user experience.

WORK EXPERIENCE

Front-end developer

YouNedia - Digital Marketing

2023 July - 2024 October

- Proficient in building dynamic and responsive web applications using React.js, with 1 year of hands-on experience.
- Actively expanding skill set by learning Next.js 14 and TypeScript to enhance capabilities in creating robust, scalable, and maintainable code.
- Well-versed in modern front-end tools like Tailwind CSS and Redux Toolkit, focusing on efficient state management and UI development.
- Strong emphasis on writing clean, reusable code and optimizing performance.
- Currently seeking opportunities to apply skills in challenging projects while expanding expertise in full-stack development.

PROJECTS

Celebrity Details

I've developed a Celebrity Information Website using React.js and TypeScript, where users can explore detailed profiles of celebrities, including their biography, birth details, career milestones, and much more!

Key Features:

Built with React.js for a seamless and interactive user experience

TypeScript for enhanced code quality, safety, and maintainability

Search and filter functionality to easily find celebrities based on name, profession, or other criteria

Detailed information on birthdays, achievements, and personal life

YouTube Promotion

I've just completed a YouTube Promotion Website using React.js and Firebase Authentication. This project was designed to help content creators easily promote their YouTube channels and videos to reach a wider audience.

Key Features:

React.js for a smooth, responsive user interface

Firebase Authentication for secure user sign-up and login

Integrated with the YouTube API to pull in real-time video data

Users can create accounts, save videos, and manage their promotion preferences

Responsive design for an optimized experience across all devices

HOBBIES & CERTIFICATION

Coding Challenges

Problem Solving

JavaScript Challenges

React Hooks Certificate

Ecommerce Website

I've developed a fully functional eCommerce website using Next.js, combining the latest features of the framework with modern web development practices.

Key Features:

Next.js 14 with TypeScript for fast performance and optimized SEO

Tailwind CSS for responsive, clean, and modern UI

Redux Toolkit for efficient state management

Fully responsive design with cross-browser compatibility

Integration with payment gateways for seamless transactions
